Chocolate and coffee - what a great combination! Our coffee scrub not only smells and looks incredible, it will make your skin feel soft and moisturized! The coffee is a fantastic exfoliator. When coffee is applied to the surface of your skin, it may help redistribute fat cells and decrease the formation of cellulite. The caffeine in the coffee also acts as a vascular restrictor and may help to shrink blood vessels, thus helping to reduce varicose veins. Your skin is then perfectly polished with our hydrating chocolate body lotion.

Please note we add a 15% service charge to all services.

All of our staff actually use both our therapy lines and our products for home use. If you have a question, please ask to speak with our staff member that is the guru for those products. We highly encourage you to book a free consultation to ensure that our services and products are tailored specifically for you.

You can also enhance your spa experience by relaxing in our warm and inviting whirlpool or swimming in our deep pool (with lap lane). And if you want to release some energy, you're welcome to enjoy our fully-equipped fitness centre. We are also one of the few facilities in Moncton that offers an infrared

sauna for our guests. This can be added to any individual or couples treatment for a small additional fee.

We're proud to offer a fully licensed facility with a selection of nibbles and snacks for those spending the day or enjoying multiple treatments.

Infrared Sauna Sessions and Subscriptions

A safe and effective therapy infrared saunas offer a number of advantages over a traditional sauna which produce additional health benefits. First, while a traditional sauna heats the body via the air, infrared saunas cause heat to be directly absorbed into the tissues, resulting in a faster and deeper heat transfer. This raises the body's core temperature and induces a powerful sweating response. Second, infrared saunas are much more comfortable than traditional saunas, because the air surrounding you remains much cooler. This is more beneficial for the respiratory system, and allows many people who would otherwise avoid saunas or leave a sauna after only a few minutes, to enjoy full sessions of infrared therapy.
